PROFESSIONAL SUMMARY

Technical Account Manager with a background in product management and software engineering. Skilled in translating complex data into actionable insights, driving revenue and user growth. Proven ability to collaborate across teams to deliver measurable impact

EXPERIENCE

Technical Account Manager | Oct 2023 - Present

Plusgrade

- Designed and built custom AI tooling (Claude Code, Kiro) to automate analytics workflows and strengthen technical decision-making in client engagements
- Served as a technical advisor in client-facing and executive discussions, translating business objectives into implementation requirements
- Acted as primary internal escalation point, performing root-cause analysis in Splunk
- Optimized payment flows, cutting churn by 35% and delivering \$1.5M in annual revenue gains
- Identified pricing inefficiencies and led willingness-to-pay analyses, resulting in a 15% revenue uplift across selected accounts
- Co-developed an automated downtime Slack alerting system, preventing up to \$50M in potential revenue loss
- First hire on the team; mentored 4 team members and established operating standards aligned with business goals

Software Engineer | May 2022 - Sep 2023

Professional Sabbatical

- Built a travel checklist app where users can check off places they have been to
- Built a leave management system tailored to China, with custom approval workflows, localized calendar and leave types
- Built a digital journal app focused on practicing mindfulness, gratitude and encouraging personal growth

Product Manager | Jan 2021 - Apr 2022

Shopee, Sea Group

- Collaborated with business stakeholders across functions to identify pain points and prioritize initiatives
- Translated business requirements into scalable features, driving over \$10M in revenue and cost savings
- *Parcel Transfer*: Launched in-transit parcel transfers between drivers, reducing delivery times and costs by 20%
- *Parcel Tracking*: Launched live map-based tracking in some markets, significantly reducing customer support ticket volume related to delivery by 40%
- *Dispute Management*: Decreased buyer-seller disputes by 30% by implementing proof of pickup and delivery
- *Logistical Efficiency*: Migrated delivery channels across all markets to a unified architecture, eliminating channel-specific dev work, accelerating change deployment, and freeing up engineering capacity
- *Last-Mile Delivery*: Scaled self-service pickup options to collection points and convenience stores, improving customer experience and lowering last-mile delivery costs by 15%

Product Manager | Sep 2019 - Jan 2021

Commontown Pte Ltd

- Led cross-functional teams to iterate on children's e-book platform and learning management system
- Drove product discovery, user research, and competitive analysis to shape feature development
- Achieved a 60% increase in user engagement and reduced churn by 40% YoY on the e-book platform

SKILLS

Troubleshooting and Monitoring: Splunk, Datadog

Data Analysis & Visualization: SQL, Excel, Python Suite (Pandas, Seaborn, Matplotlib)

Programming and Databases: Javascript, Node.js, Python, PostgreSQL, MongoDB, Firebase
